

Research Day 2026 Abstract Categories and Descriptions

Scholarly Activity

Case Reports

Review of one, two, or three clinical/educational / decedent cases to develop information to be shared for medical/educational purposes. Authors should all be involved in the care/education of the subject(s) and written consent of subject(s) must be documented.

Meta-analyses

A report generated from statistical analyses of multiple different studies to draw conclusions about an overall effect of a particular variable or intervention

Quality Improvement/Program Evaluation

Activities related to assessing processes and analyzing outcome data to improve the quality of patient care, timeliness of interventional services, and/or equity of health systems.

Service Projects

Community outreach activity where individuals or groups work together to help others and improve their lives. Service projects can be local or global.

Basic and Translational Science

Activities related to fundamental, theoretical, or experimental sciences including development of technologies and techniques.

Clinical

Activities related to safety and effectiveness of medications, devices, diagnostic products; and treatment regimens intended for human use, including analysis of established clinical practice. The Clinical category will also include Social and Behavioral Science submissions and Public Health submissions.

Social and Behavioral

Activities related to the investigation of human society, social relationships, human behavior, medical ethics, and law.

Public Health

Activities related to identifying and addressing community health needs.

Medical Education

Activities related to the design, development, and implementation of educational programs or events, including the utilization of technology in the classroom setting.
